

Thin film and clear images

# Fire CR

- Accurate diagnosis possible with clear images of up to 21 lp/mm
- Minimize pain during imaging with thin and flexible IP of various sizes
- 1.8 times longer IP lifetime with non-contact scanning

## Clear image of 21 lp/mm

• Accurate diagnosis is possible with a clear image of 21 lp/mm

Endo

Implant

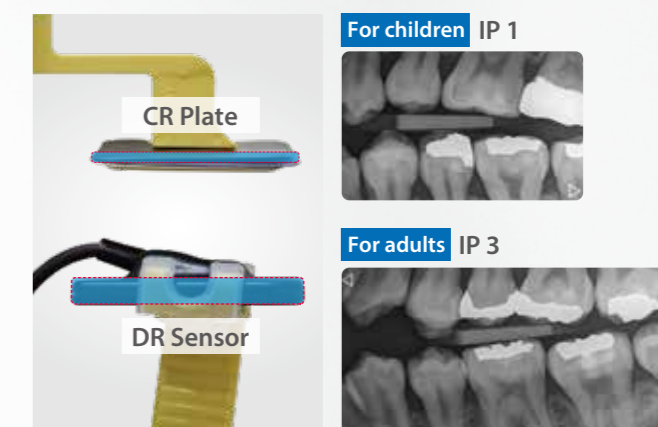

Accurate IP positioning using magnetics

## Optimized Bitewing imaging

• Optimized Bitewing imaging is possible using Bitewing dedicated IP

## Minimize pain to patients

• Thin and flexible IP minimizes foreign body sensation in patients during imaging

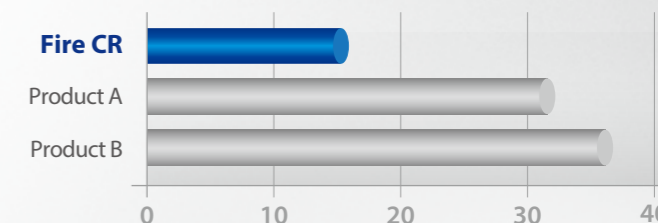

• Select a film tailored to the patient's oral cavity with IP of various sizes

Rounded corners to minimize foreign body sensation

## Acquire images only 15 seconds

• Fast image acquisition minimizes patient chair time

## IP lifetime UP with non-contact scanning

• An average of 2,000 images are possible with a single sheet of film
