Extraction of endodontic treated tooth and immediate implant placement

OIC COURSE

2.5 days 5 Jul 2024 (Fri) 14:00~18:00 6&7 Jul 2024 (Sat & Sun) 09:00~18:00

- 1. Introduction: advantages and disadvantages of immediate implant placement**
- 2. Extraction of endodontic treated tooth**
How to perform atraumatic extractions?
 - a. Stick to the basic principle of forceps and root elevator
 - b. Use a special tool
 1. Periome, Luxator, Desmotome, Proximator, Apical retention forceps
 2. Endodontic file, Extraction kit
 - c. Appropriate tooth sectioning
 - d. Guttering around the tooth
 - e. Extraction after drilling
 - f. Partial extraction
- 3. Immediate implant placement after extraction of Mn. anterior teeth**
 - a. Key points in Immediate implant placement after extraction of Mn. anteriors
 - b. Choice of implant system is critical.
 1. "One-body, narrow diameter implant system"
 - c. Installation method of Narrow one-piece implant
 1. Conservative approach is best.
 2. "Flapless surgery without graft"

4. Immediate implant placement after extraction of Mn. premolar teeth

- a. Key points in Immediate implant placement after extraction of Mn. premolars
- b. Case presentation of immediate implant on Mn. premolars

5. Immediate implant placement after extraction of Mn. molar teeth

- a. Anatomy of Mandibular Molar Region
- b. Indication and contraindication of immediate implant in Mn. molars
- c. Timing of implant in Mn molars
- d. Key points in Immediate implant placement after extraction of Mn. molars
- e. Drilling methods for mandibular posterior immediate implant
- f. Depth control for mandibular posterior immediate implant
- g. Case presentation of immediate implant on Mn. 1st molars
- h. Case presentation of immediate implant on Mn. 2nd molars

6. Immediate implant placement after extraction of Mx. anterior teeth

- a. Three-dimensional Integration of Implant Position
- b. Classification of Mx. anterior extraction socket
- c. Treatment options for Mx. anterior tooth
- d. Key points in Immediate implant placement after extraction of Mx. anteriors
- e. Treatment options for Mx. anterior tooth
- f. Case presentation of immediate implant on Mx. anteriors depending on defect types

7. Immediate implant placement after extraction of Mx. premolar teeth

- a. Anatomy of maxillary premolar region
- b. Classification of Mx. premolar extraction socket
- c. Treatment options for Mx. premolar tooth
- d. Key points in Immediate implant placement after extraction of Mx. premolars
- e. Case presentation of immediate implant on Mx. premolars

8. Immediate implant placement after extraction of Mx. molar teeth

- a. Anatomy of maxillary molar region
- b. Classification of Mx. molar extraction socket
- c. Key points in Immediate implant placement after extraction of Mx. molars
- d. Treatment options for Mx. molar tooth: Type I-a
- e. Treatment options for Mx. molar tooth: Type I-b, Type I-c
- f. Treatment options for Mx. molar tooth: Type II-a, Type II-b, Type II-c

9. Conclusion

Immediate implant placement after extraction in Mn.

Immediate implant placement after extraction in Mx.
